Project Proposal Evaluator

DECLARATION

We hereby declare that the project work being presented in the project proposal entitled **"Food Delivery Website"** in partial fulfilment of the requirements for the award of the degree of **BACHELOR OF TECHNOLOGY** at **ARDENT COMPUTECH PVT. LTD, SALTLAKE, KOLKATA, WEST BENGAL,** is an authentic work carried out under the guidance of **Mrs. Shreya Banerjee**. The matter embodied in this project work has not been submitted elsewhere for the award of any degree of our knowledge and belief.

Date: 24/09/2021

Name of the Student: Sanjoy Saha

Signature of the students: Sanjoy Saha

CERTIFICATE

This is to certify that this proposal of minor project entitled **"Food Delivery Website"** is a record of bonafide work, carried out by *Sanjoy Saha* under my guidance at **ARDENT COMPUTECH PVT LTD**. In my opinion, the report in its present form is in partial fulfilment of the requirements for the award of the degree of **BACHELOR OF TECHNOLOGY** and as per regulations of the **ARDENT**®**.** To the best of my knowledge, the results embodied in this report, are original in nature and worthy of incorporation in the present version of the report.

Guide / Supervisor

Mrs. Shreya Banerjee

Project Engineer

Ardent Computech Pvt. Ltd (An ISO 9001:2015 Certified)

ACKNOWLEDGEMENT

Success of any project depends largely on the encouragement and guidelines of many others. I take this sincere opportunity to express my gratitude to the people who have been instrumental in the successful completion of this project work.

I would like to show our greatest appreciation to *Mrs.* **Shreya Banerjee**, Project Engineer at Ardent, Kolkata. I always feel motivated and encouraged every time by his valuable advice and constant inspiration; without his encouragement and guidance this project would not have materialized.

Words are inadequate in offering our thanks to the other trainees, project assistants and other members at Ardent Computech Pvt. Ltd. for their encouragement and cooperation in carrying out this project work. The guidance and support received from all the members and who are contributing to this project, was vital for the success of this project.

CONTENTS

- Overview (description about html, css , javascript)
- Environment Setup – VS Code, Chrome Browser
- Project name - Food Delivery Website

OVERVIEW

- Web development is the work involved in developing a Web site for the Internet. Web development can range from developing a simple single static page for electronic businesses, and social network services. It includes two separation :-

1) Front end – What users see when they interact with a program, application, or platform.

2) Back end – What programmers create processes to make those interactions run smoothly.

HTML

- It stands for **Hyper Text Markup Language**.
- Standard markup language for documents designed to be displayed on a web browser.
- It is a set of tag elements which tell the browser what to display.
- It is the skeleton of the webpage.

   Tags :-

- <h1></h1> - Heading tags from **h1 to h6**
- <a> - Anchor tag href=https://
- <div></div> - div tag
- <p></p> - Paragraph tag
- - list item
-
 - line break
- <img> - image tag
- <hr> - horizontal rule

CSS

- CSS stands for Cascading Style Sheets
- It is used to add style to the webpage and tells the browser how to display the content
- CSS files are saved as .css
- Multiple CSS stylesheets can be used in a single HTML file

Tags :-

- Different styles for an HTML element are written as key and value pair separated by colon which are separated by each other using semi colon all enclosed within curly brackets
- You can write the same set of styles for multiple elements

- Eg –

```
h1{
    color: green;
}
```

JavaScript

If you want to display static content, for example, a set of images, then HTML can do the job for you. However, static pages are slowly becoming a thing of the past. Most of the content today is interactive and includes flashy slideshows, forms, and menus. They enhance user experience and add dynamicity to the website. This is achieved by scripting languages and JavaScript is one of the most famous in this regard. It lets developers make websites that interact with the user.

ENVIRONMENT SETUP

- Windows / MacOS

- Chrome / Edge

- VS Code

- VS Code Extensions – Live Server, Prettier, ES Lint

CONCLUSION

As we all know that food is the basic need in every human life, for which everyone is struggling. Yet even after their efforts, if people are still not happy with their sustenance, then the effort given behind it is completely useless. The reasons might be the people are occupied with their busy schedules, they either can't able to cook or not having time to make food and order their food from outside.

The **smartphones and the internet revolution was in its infancy in India and most restaurants promoted their menus offline using paper flyers and catalogues.**

So we have made a website that solves real world problem of humans. Food delivery has helped so many people to have food at their home. Not only that, it has also provided employment to many people who are delivering food.

FUTURE SCOPE

This order food online system project aimed at developing an online food ordering system that can be used in small places, and medium cities firstly and then on a large scale. It is developed to help restaurants to simplify their daily operational and managerial task as well as improve the dining experience of customers.

And also helps restaurants develop healthy customer relationships by providing good services. The system enables staff to let update and make changes to their food and beverage list information based on the orders placed and the orders completed.

THANK YOU
